REPORTING ERRORS AND RECOMMENDED IMPROVMENTS

(Army) You can help improve this manual. If you find any mistakes, or if you know of a way to improve the procedures, please let us know. Mail your letters, or DA Form 2028 (Recommended Changes to Publications and Blank Forms), or DA Form 2028-2 located in the back of this manual directly to: U.S. Army Tank and Armaments Command, ATTN: AMSTA-IM-MMAA, Warren, MI 48397-5000. A reply will be furnished to you. (Marine Corps) Submit NAVMC Form 10772 to the Commanding General, Marine Corps Logistic Base (Code 850), Albany, GA 31704-5000. A reply will be furnished to you.

Approved for public release, distribution is unlimited.

**DIRECT SUPPORT AND GENERAL SUPPORT MAINTENANCE
REPAIR PARTS AND SPECIAL TOOLS LIST
SECTION I. INTRODUCTION**

1. Scope.

This RPSTL lists and authorizes spares and repair parts; special tools; test; measurement, and diagnostic equipment (TMDE); and other special support equipment required for performance of direct support and general support maintenance of the 6.2 and 6.5 liter V-8 diesel engines. It authorizes the requisitioning, issue, and disposition of spares, repair parts, and special tools as indicated by the source, maintenance, and recoverability (SMR) codes.

2. General.

In addition to Section I, Introduction, this Repair Parts and Special Tools List I divided into the following sections:

a. Section II Repair Parts List. A list of spares and repair parts authorized by this RPSTL for use in the performance of maintenance. The list also includes parts which must be removed for replacement of the authorized parts. Parts lists are composed of functional groups in ascending alphanumeric sequence, with the parts in each group listed in ascending figure and item number sequence. Bulk materials are listed in item name sequence. Repair parts kits are listed separately in their own functional group within Section II. Repair parts for repairable special tools are also listed in this section. Items listed are shown on the associated illustration(s)/ figure(s).

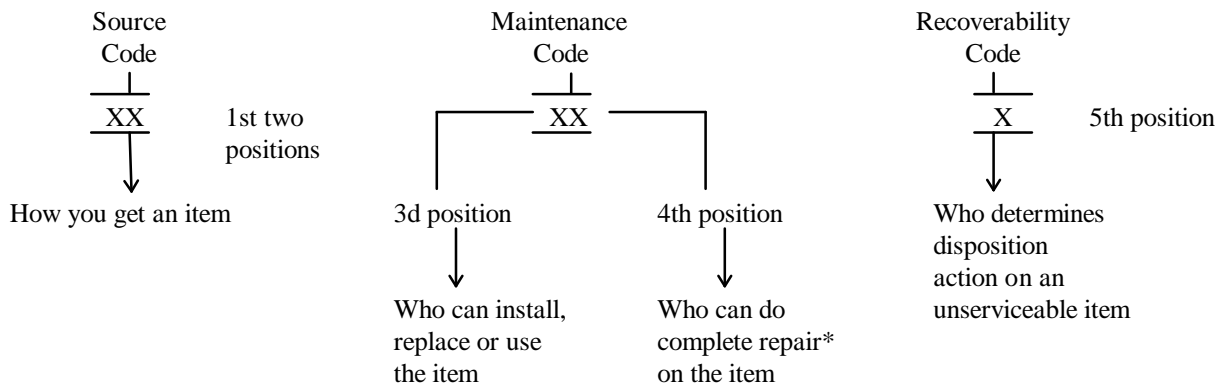

b. Section III. Special Tools List. A list of special tools, special TMDE, and other special support equipment authorized by this RPSTL (as indicated by Basis of Issue (BOI) information in DESCRIPTION AND USABLE ON CODE column) for the performance of maintenance.

c. Section IV. Cross-Reference Index. A list, in National Item Identification Number (NIIN) sequence, of all National stock Numbered items appearing in the listing, followed by a list in alphanumeric sequence of all part numbers appearing in the listings. National stock numbers and part numbers are cross-referenced to each illustration figure and item number. The figure and item number index lists figure and item numbers in alphanumeric sequence and cross-references NSN, CAGEC, and part numbers.

3. Explanation of Columns Section II and III

a. Item No. (Column (1)). Indicates the number used to identify items called out in the illustration.

b. SMR Code (Column (2)). The Source, Maintenance, and Recoverability (SMR) code is a 5 position code containing supply/requisitioning information, maintenance category authorization criteria, and disposition instruction, as shown in the following breakout:

*Complete Repair Maintenance capacity, capability, and authority to perform all corrective maintenance tables of the "Repair" function in a use/user environment in order to restore serviceability to a failed item.

TM 9-2815-237-34p

(1) Source Code. The source code tells you how to get an item needed for maintenance, repair, or overhaul of an end item/equipment. Explanations of source codes follows:

Code	Explanation
PA PB PC** PD PE PF PG KD KF KB	<p>Stocked items; use the applicable NSN to request/requisition items with these source codes. They are authorized to the category indicated by the code entered in the 3d position of the SMR code.</p> <p>** NOTE: Items coded PC are subject to deterioration.</p> <p>Items with these codes are not to be requested/requisitioned individually. They are part of a kit which is authorized to the maintenance category indicated in the 3rd position of the SMR code. The complete kit must be requisitioned and applied.</p>
MO - (Made at Unit Level) MF - (Made at DS Level) MH - (Made at Specialized Act(SRA;)) MD - (Made at Depot)	<p>Items with these codes are not to be requested/requisitioned individually. They must be made from bulk material which is identified by the part number in the DESCRIPTION AND USABLE ON CODE (UOC) Repair column and listed in the bulk material group of the repair parts list in-the RPSTL. If the item is authorized to you by the 3rd position code of the SMR code, but the source code indicates it is made at a higher level, order the item from the higher level of maintenance.</p>
AO - (Assembly by unit Level) AF - (Assembled by DS Level) AH - (Assembled by GS Level) AL - (Assembled by SRA) AD - (Assembled by Depot)	<p>Items .with these codes are not to be requested/requisitioned individually The parts that make up the assembled item must be requisitioned or fabricated and assembled at the level of maintenance indicated by the source code. If the 3rd position code of the SMR code authorized you to replace the item, but the source code indicates the item is assembled at a higher level order the item from the higher level of maintenance.</p>
XA - Do not requisition an "XA"-coded item. Order its next higher assembly. (Also, refer to the note below.) XB - If an "XB" item is not available from salvage, order it using CAGEC and part number given. XC - Installation drawing, diagram, instruction sheet, field service drawing, that is identified by manufacturer's part number. XD - Item is not stocked. Order an "XD"-coded item through normal supply channels using the CAGEC and part number given, if no NSN is available.	

NOTE

Cannibalization or controlled exchange when authorized, may be used as a source of supply for items with the above source codes, except for those source coded "XA".

(2) Maintenance Code. Maintenance codes tell you the lever(s) of maintenance authorized to USE and REPAIR support items. The maintenance codes are entered in the third and fourth positions of the SMR code as follows:

(a) The maintenance code entered in the third position tells you the lowest maintenance level authorized to remove, replace, and use an item. The maintenance code entered in the third position will indicate authorization to one of the following levels of maintenance.

Code	Application/Explanation
C	- Crew or operator maintenance done within unit maintenance
O	- Unit level can remove, replace, and use the item.
F	- Direct support level can remove, replace, and use the item.
H	- General support level can remove, replace, and use the item
L	- Specialized repair activity can remove, replace, and use the item
D	- Depot level can remove, replace, and use the item

TM 9-2815-237-34P

(b) The maintenance code entered in the position tells you whether or not the item is to be repaired and identifies the lowest maintenance level with the capability to do complete repair (i.e., perform all authorized repair functions). (NOTE: Some limited repair may be done on the item at a lower level of maintenance, if authorized by the Maintenance Allocation Chart (MAC) and SMR codes.) This position will contain one of the following maintenance codes:

Code	Application/Explanation
O	- Unit is the lowest level that can do complete repair of the item
F	- Direct support is the lowest level that can do complete repair of the item.
H	- General Support is the lowest level that can do complete repair of the item.
L	- Specialized repair activity (designate the specialized repair activity) is the lowest level that can do complete repair of the item.
D	- Depot is the lowest level that can do complete repair of the item.
Z	- Nonreparable. No repair is authorized
B	- No repair is authorized. (No parts or special tools are authorized for the maintenance of a "B" coded item.) However, the item may be reconditioned by adjusting, lubricating etc., at the user level.

(3) **Recoverability Code.** Recoverability codes are assigned to items to indicate the disposition action on unserviceable items. The recoverability code is entered in the fifth position of the SMR code as follows:

Recoverability Code	Application/Explanation
Z	- Nonreparable item. When unserviceable, condemn and dispose of the item at the level of maintenance shown in 3d position of SMR code.
O	- Repairable item. When uneconomically repairable, condemn and dispose of the item at unit level.
F	- Repairable item. When uneconomically repairable, condemn and dispose of the item at the general support level
H	- Repairable item. When uneconomically repairable, condemn and dispose of the item at the general support level
D	- Repairable item. When beyond lower level repair capability, return to depot. Condemnation and disposal of item not authorized below depot level.
L	- Repairable item. Condemnation and disposal not authorized below specialized repair activity (SRA).
A	- Item requires special handling or condemnation procedures because of specific reasons (e.g.: precious metal content, high dollar value, critical material, or hazardous material). Refer to appropriate manuals/directives for specific instructions.

c. **CAGEC (Column (3)).** The Commercial and Government Entity Code (CAG3C) is a 5-digit numeric code which is used to identify the manufacturer, distributor, or Government agency, etc., that supplies the item.

d. **Part Number (Column (4)).** Indicates the primary number used by the manufacturer (individual company, firm, corporation, or Government activity), which controls the design and characteristics of the item by means of its engineering drawing, specifications standards, and inspection requirements to identify an item or range of items.

NOTE

When you use a NSN to requisition an item, the item you receive may have a different put number from the part ordered.

TM 9-2815-237-34P

e. Description and Usable on Code (UOC)(Column (5)). This column includes following information:

- (1) The Federal item name and, when required, a minimum description to identify the item.
- (2) Items that are included in kits and sets are listed below the name of the kit or set.
- (3) Spare/repair parts that make up an assembled item are indented and listed immediately following the assembled item line entry.
- (4) Part numbers for bulk material are referenced in this column in the line item entry for the item to be manufactured/fabricated.
- (5) When the item is not used with all serial numbers of the same model, the effective serial numbers are shown on the last line(s) of the description (before UOC).
- (6) The usable on code, when applicable (refer to paragraph 5, Special Information).
- (7) In the Special Tools List section, the basis of issue (BOI) appears as the last line(s) in the entry for each special tool, special TMDE and other special support equipment. When density of equipments supported exceeds density spread indicated in the basis of issue, the total authorization is increased proportionately.
- (8) The statement "END OF FIGURE" appears just below the last item description in column 5 for a given figure in both Section II and Section III.

f. QTY (Column (6)). QTY (quantity per figure column) indicates the quantity of the item used in the breakout shown on the illustration figure, which is prepared for a functional group, subfunctional group, or an assembly. A "V" appearing in this column in lieu of a quantity indicates that the quantity is variable and the quantity may vary from application to application.

4. Explanation of Columns (Section IV)

a. National Stock Number (NSN) Index

(1) **Stock Number column.** This column lists the NSN by National Item Identification Number (NIIN)

sequence. The NIIN consists of the last nine digits of the NSN (i.e., $5305\text{-}01\text{-}\overbrace{674\text{-}1467}^{\text{NSN}}$). When using this column

to locate an item, ignore the first 4 digit of the NSN. However, the complete NSN should be used when ordering item by stock number.

(2) **Fig. column.** This column list the number of the figure where the item is identified/located. The figures are in numerical order in Section II and Section III.

(3) **Item column** The item number identifies the item associated with the figure listed in the adjacent FIG. column. This item is also identified by the NSN listed on the same line.

b. Part Number Index. Part numbers in this index are listed by part number in ascending alphanumeric sequence (i.e., vertical arrangement of letter and number combination which places the first letter or digit of each group in order A through Z, followed by the numbers 0 through 9 and each following letter or digit in like order).

(1) **CAGEC column.** The Commercial and Government Entity Code (CAGEC) is a 5-digit numeric code used to identify the manufacturer, distributor, or Government agency etc., that supplies the item.

(2) **Part Number column.** Indicates the primary number used by the manufacturer (individual firm, corporation, or Government activity), which controls the design and characteristics of the item by means of its engineering drawings, specifications standards, and inspection requirements to identify an item or range of items.

(3) **Stock Number column.** This column lists the NSN for the associated part number and manufacturer identified in the PART NUMBER and CAGEC columns to the left.

TM 9-2815-237-34P

(4) **Fig. column.** This column lists the number of the figure where the item is identified/located in Section II and Section III.

(5) **Item column.** The item number is that number assigned to the item as it appears In the figure referenced in the adjacent figure number column.

5. Special Information.

a. **Usable on Code.** The usable on code appears in the lower left corner of the Description column heading. Usable on codes are shown as “UOC:” in the Description Column (justified left) on the first line applicable item description/nomenclature. Uncoded items are applicable to all models. Identification of the usable on codes used in the RPSTL are:

Code	Used On	Code	Used On
AVY	M1097A1	B25	M1043A2
All	M966A1	C17	M1025A2
A13	M998A1	HVY	M1097
A14	M1038A1 W/W	H11	M966
A15	M997A1	H13	M998
A20	M1035A1	H14	M1038 W/W
A24	M1045A1	H15	M997
A25	M1043A1	H16	M996
A26	M1044A1 W/W	H17	M1025
A27	M1046A1 W/W	H18	M1026 W/W
BVY	M1097A2	H20	M1035
B15	M997A2	H21	M1037
B16	M996A1	H24	M1045
B17	M1025A1	H25	M1043
B18	M1026A1 W/W	H26	M1044 W/W
B20	M1035A2	H27	M1046 W/W
B24	M1045A2	H28	M1042 W/W

b. **Fabrication Instructions.** Bulk materials required to manufacture items are listed in the Bulk Material Functional Group of this RPSTL. Part numbers for bulk materials are also referenced in the description column of the line item entry for the item to be manufactured or fabricated. Detailed fabrication instructions for items to be manufactured or fabricated are found in and TM 9-2320-280-20 and TM 9-2815 237-34.

c. **Assembly Instruction.** Detailed assembly instruction for items source coded to be assembled from component spare/repair parts are found in TM 9-2320-280-20 and TM 9-2320-280-34. Items that make up the assembly are listed immediately following the assembly item entry or reference is made to an applicable figure.

d. **Kits.** Line item entries for repair parts kits appear in Functional Group 9401 in Section II.

e. **Index Numbers.** Items which have the word BULK in the figure column will have an index number shown in the item number column. This index number is a cross reference between the National Stock number/Part Number Index and the bulk material list in Section II.

f. **Associated Publication.** The publications listed below pertain to the 6.2 and 6.5 liter V-8 diesel engines and components:

TM 9-2320-280-10	Operator's Manual
TM 9-2320-280-10HR	Hand Receipt, Operators Manual
TM 9-2320-280-20	Unit maintenance Manual
TM 9-2320-280-24P	Unit, Direct Support and General Support maintenance Repair parts and Special Tools port
TM 9-2320-280-34	Direct Support and General Support Maintenance Manual
TM 9-2815-237-34	Direct Support and General Support Engine Maintenance Manual
DMWR 9-2815-237	Depot Maintenance Work Requirements, Engine

g. **Illustrations.** Item numbers on illustrations have been assigned in clockwise sequence, starting at the 11 o'clock position (upper left).

TM 9-2815-237-34P

h. USMC SMR Codes. There are cues in TM 9-2815-237-34P where the USMC uses different SMR codes than the Army. The list provided below identifies these differences and is for Marine Corps use only. This list is the only place in TM 9-2815-237-34P where these differences appear. It is recommended that Marine Corps technicians make the appropriate annotations within the body of this technical manual.

FOR USMC USE ONLY

i. **BOI.** The Basis of Issue (BOI) for the tools listed in section of this RPSTL is as follows:

Level	Unit Description	BOI
Unit (O)	{ Maintenance unit, section or team (authorized a common tool set)	1
Direct Support (DS)	{ Company/System Support Team (except the following)	1
	{ Motorized Division/Heavy Division Heavy Maintenance Co.	2
	{ Airborne/Assault Division Forward Support Co.	2
	{ Heavy Maintenance Co.	3
	{ Light Infantry Division Heavy Maintenance Co.	6
	{ Light Maintenance Co.	0
General Support (GS)	{ Maintenance Co.	1
	{ Heavy Equipment Maintenance Co.	2

j. The NSNs for the Unit, Direct, and General Support Special Tool Kits are listed on page B-20, in Section III of the TM 9-2320-280-20-3 manual.

6. How to Locate Repair Parts.

a. When National Stock Number or Part Number is Not Known.

(1) **First.** Using the table of contents, determine the assembly group or subassembly group to which the item belongs. This is necessary since figures are prepared for assembly groups and subassembly groups, and listings are divided into the same groups.

(2) **Second.** Find the figure covering the assembly group or subassembly group to which the item belongs.

(3) **Third.** Identify the item on the figure and use the Figure and Item Number Index to find the NSN.

b. When National Stock Number or Part Number is Known.

(1) **First.** Using the Index of National Stock Numbers and Part Numbers, find the pertinent National Stock Number or Part Number. The NSN index is in National Item Identification Number (NIIN) sequence (see 4.a.(1)). The part numbers in the part number index are listed in ascending alphanumeric sequence (see 4.b.). Both indexes cross reference to the illustration figure and item number of the item you are looking for.

(2) **Second.** After finding the figure and item number, verify that the item is the one you're looking for, then locate the item number in the repair parts list for the figure.

TM 9-2815-237-34P

7. How to Identify Engine Models.

1990 and above engines have some new and revised parts which are not interchangeable with parts for previous model engines. Make sure you know which engine model you have before ordering replacement parts. The 1990 engine is identified by a decal which is adhered to the left rocker arm cover. The 6.5L engine is identified by a serial number bar code decal.

<p>IMPORTANT ENGINE INFORMATION THIS ENGINE CONFORMS TO U.S. EPA REGULATIONS APPLICABLE TO 1990 MODEL YEAR HEAVY-DUTY DIESEL ENGINES. THIS ENGINE HAS A PRIMARY INTENDED SERVICE APPLICATION AS A LIGHT HEAVY-DUTY DIESEL ENGINE ENGINE FAMILY LGM06, 2DAB3 MODEL - V8-6.2 ADV. HP 150 AT 3600 RPM FUEL RATE AT ADV. HP 46.0 MM³/STROKE IDLE SPEED 650 RPM-NEUTRAL FUEL INJECTION TIMING IS PRESET AT FACTORY. VALVE LASH-HYDRAULIC LIFTERS ADJUSTMENT NOT REQUIRED DISP. 6.2L</p>	<p>F E D 9 0</p>
